

## **Kindercare Pediatrics is looking to hire a Physician Assistant to help with our Oral Immunotherapy Clinics.**

Kindercare Pediatrics is a multidisciplinary pediatrics clinic, offering primary care Pediatrics and many pediatric subspecialty services.

Time requirement: Tuesdays, and possibility to add Fridays (approximate hours 9am-5pm)

Salary: \$55 per hour

Location: 491 Eglinton Ave W, Suite 305

Job description: we see children with food allergies undergoing oral immunotherapy ('desensitization treatment'). The patients come in every 2-4 weeks to increase their dose of allergen. The PA's job would be to assess patients before their dose, and then help families to administer the dose. The families stay in the clinic for 1 hour in case of allergic reactions. The PA would assess them again prior to discharge. A pediatric allergist will always be present in the clinic to help out if needed. The PA would also be responsible for writing the clinic notes and the prescriptions for the subsequent visits. Additionally, the PA would liaise with the pharmacy team to confirm the list of patients coming each week.

We are looking for a physician assistant who has a lot of experience in pediatrics, and is comfortable working with babies and young children. It would be great if the PA also has experience with treating allergic reactions and anaphylaxis; but this is not a requirement.

Interested candidates should email their CV and list of references to: [robyn.paulin@kindercare.ca](mailto:robyn.paulin@kindercare.ca)
