Qualifications:

Education

1. Undergraduate Degree
2. Graduate of a Canadian Accredited Physician Assistant Education Program.
3. Eligible to challenge the National Physician Assistant Certificate Exam, or Canadian Physician Assistant Certification – Mandatory, ACLS, BCLS, or already qualified

Experience

1. Experience working in an Emergency Department setting is strongly preferred, although not necessary.

Competencies

1. Integrate all the core PA competencies to provide optimal, ethical, and patient-centered medical care. Perform a complete and appropriate clinical assessment of a patient and formulate a clinical treatment plan.
2. Effective use of diagnostic and procedural skills Use preventive and therapeutic interventions effectively.

Responsibilities:

Clinical and General Responsibilities

- Full capability and ability to obtain a full medical history, provide a differential diagnosis, and a complete treatment plan for the patient and be able to communicate this to the supervising physician in both written and verbal form.
- serology, urinalysis, blood gas, ECG, peak flow, and plain film x-ray.
- Perform procedures such as PFT's and Spirometry, ECG, suturing, collect blood samples, urine samples and provide injections IM/SQ as needed and required.

Communication

- Provide relevant information and explanations, including a proposed treatment plan, to the supervising physician and seek further direction where appropriate. The requirement would be to seek advice and guidance where appropriate and needed.
- Provide education to patients, families, and other health providers as appropriate to the clinical setting and communicate with the multidisciplinary team.

Medical Documentation and Record Keeping

- Maintain clear, accurate, and appropriate records of the patient encounter and management plan. Clear and precise differential diagnoses where appropriate and necessary and treatment and disposition plan as appropriate.

Collaborate with our Multidisciplinary Team

- Collaboration with all aspects of the Urgent Care/Primary Care team including (but not limited to) physicians, nurses, nurse practitioners, clerical staff, technicians, physiotherapists and occupational therapists, social workers, pharmacists patient representatives, volunteers, and administrative staff to provide high-quality care for patients.
